Scope for project « Sylc corp»

Content managment system

- need to implement a cms to be able to manage :

```
o ability to manage all standard content from all pages(text,picture,banners,links,etc)
o ability to add/remove videos for the index and media page
o ability to send leads information from forms to their associated icontact folders
also a copy of the lead is sent into the admin ,it should be sent to the clients
email(will provide email information in the near future)

o ability to add/remove/edit cars(manually one by one)
o import/export functionality with ability to upload multiple cars all at once
```

list of Icontact category folder names with the link of their associated form
the lead information sent from the forms on the webpages to their associated icontact category folder

| icontact category name	link of associated form
